

# SMART<sup>F</sup>

2.360

*Suitable for passenger transport.  
Tested according to ISO 7176-19*

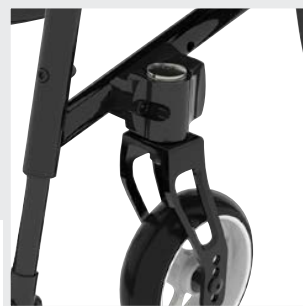

**MEYRA<sup>®</sup>**

Smooth transition from front frame to seat

Innovative, "Light" brakes made of aluminium and swivel-mounted

Individually adjustable chassis

Folding system optimised to reduce size

## New Active Line

### **COST EFFECTIVENESS**

- for long-term care, with adjustment options to carry out different functions, which saves subsequent costs
- comes with a comprehensive range of standard equipment, which reduces the need for expensive customisations
- minimal wear and tear thanks to the integral construction of the frame and the quality of the components

### **THERAPEUTIC VALUE**

- the optimal smoothness and lightweight design facilitate the independence of the user
- can be adjusted to suit various functions and individual needs of the user thanks to precise adjustments of back, seat and chassis
- comprehensive range of equipment for long-term users
- compact sitting, moving and transport thanks to optimised frame
- adjustable seat and back strap, individually adjustable back height
- optimum mobility traits: lighter, sportier, easier to tilt and turn

### **FIELD OF USE**

- for permanent and long-term care
- for people with paraplegia
- very well suited for various conditions, also for severely disabled people
- for users lacking the function of their lower extremities (lateral transfer, propelled with hand rims)
- for very active wheelchair users, handbikers and frequent travellers
